

Pre-Program Training

Pre-Program Training (PPT) is undergoing a revision and will look different this year.

Feedback from previous years:

- Highly presentation based
- Too much information on crisis scenarios
- Not enough practice of daily mentor responsibilities
- Did not prepare mentors for their role, and they have to learn by experience during the first session

What's New:

- More focus on mentor specific duties
- Scenarios to practice & simulate daily responsibilities
- Facilitator questions to gain insight into mentor thought processes, strengths, and weaknesses.

Ultimately, mentors should leave PPT having practiced their role and feel more confident going into the first session.
