

5. Body Alterations

No body alterations, including tattoos or piercings, dying or cutting hair are to be obtained while on a Program, even with parental consent or if a student is over 18 years old.

Scenario:

During free time, a student returns with what appears to be a small wrist tattoo. The student explains it's a "temporary tattoo" done at a local shop that lasts a few weeks. Another student says they're planning to go later that day to get one too.

- Does "temporary" still violate the policy?
- What matters more: permanence or the act itself?
- Do you stop the second student from going?
