

Epinephrine On Programs

- The student should also be instructed to carry their epinephrine with them at all times and inform staff where it is kept. **Their mentor should have the other.** When that mentor is “off” the EpiPen should be given to another staff member.
- If a student is prescribed Epinephrine, they have an Allergy POA on file. Staff should familiarize themselves with the student’s Plan of Action in case of an allergic reaction
 - ALUMNI: How do you instruct your team to familiarize themselves with medical info?
- If deployment is necessary, **students should always be asked to self-administer** if they are able. If they cannot, staff will administer for them.

You should have completed your Epinephrine training during your Online Modules.

You can find our SSB Anaphylactic policy and protocols in the Staff Manual. [Click here!](#)
