

Mental & Emotional Health

- In addition to medical health history, each student is expected to report any mental or emotional health history.
 - We are reliant on the information they provide to determine if we can fully support and accommodate each student on program.
- **SSB is not a therapeutic program.** We cannot diagnose students for any mental or emotional health disorders or issues.
- Our **goal is for each student to successfully complete program in a safe environment.**
- That said, sometimes new issues are triggered by being away from home, in a new environment, or caused by stress brought on by being on program.
