

Bill Credit Card for Students (OXFORD)

For campuses that give Bill credit cards cards to the students for meals:

- Cards are preloaded on the budget and activated by Lisa
- PD to do by check-in: Make sure all cards are added to the budget.
- During check in: Assign cards to students as they check in from the card binder. Note the card number assigned to the student in the tracker. [Example here](#) (column M).
- During orientation, remind students that there is a set budget of \$20 per meal. This means that if they try to purchase something that is \$20.01, it will decline. Encourage students to keep track of their funds and how much is rolling over on a note on their phones.
- CD will have to add funds to each student card each morning (\$20). Funds will roll over if students do not use the full amount.
- All cards will be named “Meal# UCLA,” so you can type in “Meal” for example and select all to assign \$20 per card. **Walkthrough time!**
- Students will not have access to check how many funds they have that have rolled over. To review available balances:
 - Go to the budget in the app to view funds assigned to each card number.
- At the end of each session: zero out all student cards so that we retain rollover money.
