

Art of Investigation

- Thank Eric for letting you know, but also remind him of the protocol and assure him that the correct steps will be taken to ensure the situation is handled properly.
- Send a message to your staff group chat, letting them know to keep an eye on Maya and Jordan and that more will be discussed and explained after room checks during the staff meeting. Let the mentors who are doing room checks know to keep an eye out for any weed/alcohol in Jordan's room.
- Once the message has been sent, bring along another staff member and conduct a room search in Jordan's room and ask Jordan about the letter/messages.
- Have a mentor/staff post up on Maya and Jordan's floors while the staff meeting is going on for safety/supervision purposes.
- Bring attention to the situation at hand during the staff meeting and gather additional facts/details/information from other staff members. Ask the staff who did room checks if anyone witnessed/smelled anything coming from Jordan's room.
- After the staff meeting, bring Maya into the office/a common space to ask how she's doing and gather any information on the situation from her side. After speaking with her, have staff walk her back to her room.
- After speaking with Maya, walk to Jordan's room and conduct a room search along with another staff member.
- After speaking with Maya, bring Jordan into the office for a conversation and have him explain what's going on and hear his side of the story.
