

# Art of Investigation continued...

## Night 6.

It's now the 6th night of the program. After lights out again you hear noises coming from the same room. Same girls from last night are awake giggling again. This time Mentor 1 was making rounds. Mentor 1 knocks on the doors and hears whispers, some items being knocked over, and then Emma nervously answers the door sleepily, like she's been in bed. Mentor 1 asks Emma if everything is alright, and asks them to open the door all of the way so they can see the whole room and roommates. From the Mentor's perspective everything looks OK, but Ava has a very nervous look on her face. M1 asks her if everything is ok and Ava just nods yes. M1 reminds the girls that they have already been issued a verbal warning for this type of behavior and technically they should get a written contract, but if they just go to bed now maybe they can have one more chance before having to enact an official written contract as this continued behavior is disrespectful. M1 brings this information back to the nightly staff meeting. M2 is ready to send all 4 girls home for being disrespectful and suspects they were up to no good. "Why wait until someone gets hurt? Let's just send them all home tomorrow, for the sake of safety." M1 says that she trusts that if something was going down they would have said something to her.

**What do you do as CD in this scenario and what do you discuss with your team in the nightly meeting you are currently in?**
