

Art of Investigation continued...

Day 7.

It's now the morning of Day 7. You notice Lily is very slow today. She was a little late for breakfast, is a little pale, slightly sweaty, and smells like... maybe hand sanitizer and a lot of body spray? Mia was also late, but looks better than Lily. Ava asked Mentor 2 for some ibuprofen because her head hurt. She seemed very nervous. She says very little to you, but when she sees M1 walk up to breakfast she asks if she can go talk to her. You allow it.

You heard that Ava told M1 that she's uncomfortable in her room. She wants to switch rooms because she can't sleep and doesn't like her roommates. As a team you again assume it's her social anxiety and encourage her to stick it out. She says fine.

As the CD you are now on high alert. Something went down last night in that room, you can feel it. You keep an eye on all 4 girls at breakfast. After breakfast Emma asks if she can speak with you. She says that she's nervous to bring this up because she doesn't want to be a snitch, but that the other girls have alcohol and were drinking last night. You ask if all 4 drank and she says she didn't touch it, she knows the rules. You ask about the other 3 and she says she doesn't know but she thinks they all drank. You ask how they got the alcohol and she says all three of them were in the store together but that she was shopping alone and she thinks Ava was also alone, but she's not sure. That's all she knows. But she's pretty sure it came from that store. She hadn't seen it before last night. You still have an hour before you leave for class this morning. What do you do?

Put the following cards in order of your process to investigate this incident:
