

How can a Case be created?

1. **Manually:** A SSB Salesforce user logs into Salesforce and creates the case
 - [Salesforce Cases Cheat Sheet](#)
2. **Automatically: Emails sent to alerts@summerspringboard.com**
 - a. Emailing alerts@ automatically creates a case
 - b. If the email is responded to from within the salesforce case, subsequent emails on that same email chain will update the case instead of creating a new case each time
3. **[Incident Report](#)** - Incident reports should be created by campus teams within **24 HOURS** of the incident taking place.
