

Scenario 2

Update 2: While you were debating what to do Hector called his dad to let him know that he had an allergic reaction to the pasta in the dining hall but he is OK and assures his dad that he will be more careful going forward. He told his dad his mentor ***saved his life***, because he forgot to bring his epipen with him to the dining hall.

Dad is relieved to hear that he is ok and agrees with him that the mentor did the right thing in that moment.
