

Plan of Action (POA) Example - Student

Maddie's medical form listed *Type 1 Diabetes* as a chronic physical health condition.

After following up with her family for more details, we've summarized her condition + needs in the Description:

Type 1 Diabetes: Maddie has been self managing with a pump for 3 years. Refrigeration for insulin & hormone therapy meds. A dedicated outlet in room (ideally near bed) to charge iphone, watch (she uses these devices to monitor sugars and both work to deliver insulin remotely) and blood sugar display. Her alarm goes off at a low during night (but not dangerous low) level at which point she'll wake up and take some juice/crackers on her own. He has done multiple overnight camps (including outdoor camping) and had no issues. Takes hormone medication daily.

We requested that she, her guardian and her doctor complete a Wellness Assessment and Plan of Action.
