

Best practices to get a snapshot of your session to front load it with your mentors & be prepared yourself:

- ❑ What Allergies/Health Waivers do we have and how severe are they? Make sure staff are briefed (don't rely on them just reading!)
 - ❑ Revisit Epi for staff - who is designated staff person holding it?
 - ❑ What is the plan for a Diabetic student (+ contingency if power goes out)
- ❑ What dietary restrictions does your program have?
- ❑ POAs - Familiarize yourself with students on the session who have an existing POA. Does your field team have any questions? What tweaks can you suggest to help make group management easier for your team
- ❑ Team Check in - How is your team doing (get a gauge on where they are emotionally)? Do they have a plan for downtime to recharge during the session?
