

Facilitating a Mentor Group

- Knowledge Building
 - Slidedeck with crucial information, such as policies & protocol.
 - Example: What is Reach? How to download & sign in, what we use it for, how to check in students, how to see medical information, etc.
- Scenario
 - For crucial mentor responsibilities, there will always be a scenario immediately after the knowledge building section to test their understanding & practice their skills.
 - Example: Every mentor gets assigned a student name that they have to check into the program on Reach for check in day, a class, an afternoon activity, and bed checks.
- Facilitator Questions
 - Questions for campus leadership to ask mentors to check their understanding or explain more complicated situations.
 - Example: What should you do if you see all students checked into an afternoon activity, but notice that 2 students are still checked into the classroom?
 - After bed checks on night one of the program, should students ever have the “Checked In” location?
