

What is Anaphylaxis?

- Anaphylaxis is a **severe, potentially life-threatening allergic reaction**.
- It typically occurs **within minutes** of exposure to an allergen (e.g., food, insect stings, medications).
- It involves **more than just a skin reaction** — a combination of symptoms affecting **multiple body systems**.

➡ **Skin + Something Else = Anaphylaxis**

Recognizing the Signs

Body Systems Affected:

- **Skin:**
 - Hives
 - Flushed or pale skin
