

Reach Communication (Mobile)

Direct Messaging and Group Messages

- Use **Messaging** > Button on top  **select a user and compose a message**
- You will have access to send emails but you should not use this.
- There is also an option to send texts but you will not have access to this function.

Push Notifications:

- Push messages are free messages that are sent from REACH to the REACH mobile app. There is no cost to these messages, however, receiving them is subject to the user having the mobile app installed and also having notifications activated in the mobile app.
