

Art of Investigation

You are the Campus Director. It is day 5 of the program. On the night of day 5, after lights out, one of your Mentors was doing “night rounds” and heard a loud noise coming from a girls room. There are 4 students in this room.

- **Mia** - 17, super engaged in class, loud by nature, loves to joke and giggle.
- **Lily** - 16, traveled with Mia, her cousin. Her parents are vacationing in Mexico and are not home.
- **Ava** - 16, neurodivergent from her medical form. She gets nervous in social settings and has admitted she has a hard time making new friends.
- **Emma** - 17, also very committed to the program.

This is the second session, so you have really gotten to know your Mentors.

Mentor 1 is very laid back. Always a student favorite and has proven to be really good at getting students to share vulnerable information about themselves, but isn't a stickler for the rules. In her mind everyone deserves a second chance.

Mentor 2 is your disciplinary. Last session they issued 5 verbal warnings in unrelated cases and made a point in telling you that this session the team really needs to step it up! They are a highschool teacher at an inner city school during the year so they claim to have “seen it all”.
