

What should be sent to Alerts@ ?

- Items that should be reported because they could turn into a bigger issue with a student
- May require some follow-up or could be closed with little-to-no follow-up
- Used to keep track of behavioral patterns/issues
- These cases could be elevated to escalated cases
- **To prevent duplicate cases, all communications about a specific case should be made through the same case on Salesforce**

Remember: A case is created EVERY TIME an email is sent in
