Supervisor's Investigation Workflow

Use this 5-step checklist to ensure documentation is objective and safe.

Safety First: Is everyone physically and emotionally safe right now?

Information Gathering: Interview witnesses separately. Write down exactly what they said, not what you think they meant.

Factual Documentation: Instead of writing "Staff was angry," write "Staff raised voice and used profanity in the presence of students."

Health Assessment: Explicitly ask: "Is there anything physically or emotionally impacting your ability to perform your duties?"

Level Determination: Match the facts against the Stoplight Grid above and file the corresponding form section.
